

Finishing TouchTM

Professional Aerosol Sizing

Looking Good Made EasyTM

Get superior results with Finishing Touch

Finishing TouchTM brand professional aerosol sizing gives clothes a crisp and fresh “like new” appearance that makes that all-important difference.

Designed for professional use, *Finishing Touch* is a premium formulation that provides superior results on drycleanable, wetcleanable and washable garments. *Finishing Touch* quickly helps garments look their best, even in fast-paced production environments.

What’s more, with its unique spray nozzle design, *Finishing Touch* offers a real improvement in reliability, ease of use and economy of application.

- **Designed for Professionals.**

Finishing Touch is designed for use with commercial finishing equipment. Formulated to meet the requirements of professional cleaners, it produces superior results on a wide range of drycleanable, wetcleanable, and washable fabrics. It’s also perfect for touch-up pressing.

- **Makes a Good Finish Even Better.**

Finishing Touch gives garments a superior look and feel compared to other brands.

- **Better Value for Money.**

The higher concentration of active ingredients means *Finishing Touch* delivers a uniform, crisp, wrinkle-free appearance with just the right feel, body and drape.

- **More Economical.**

Because of its unique spray nozzle, *Finishing Touch* can be applied to garments faster with none of the product waste associated with over-spray or over-wetting of the garment.

- **Eliminates Common Problems.**

Finishing Touch is designed to eliminate annoying problems such as clogged nozzles, garments sticking to the presses, scorching, flaking and garment discoloration. Such problems, often characteristic of other brands, are wasteful and time consuming to correct.

Instructions For Using Finishing Touch™ Aerosol Sizing

Ensure a Good Start

- ☐ Shake container gently several times using a rolling wrist motion.
- ☐ Line up anti-clog nozzle arrow with red mark on container.

Directions

- ☐ Hold can at a 45° angle, 8 to 12 inches from fabric.
- ☐ To activate spray, push nozzle forward quickly and completely.
- ☐ With nozzle pointing toward fabric, spray lightly and evenly in a sweeping motion.
- ☐ Cover as much area as possible before releasing nozzle.
- ☐ Release nozzle quickly to shut off spray.
- ☐ Press fabric immediately.
- ☐ Large items should be sprayed and pressed one portion at a time.
- ☐ Repeat as needed for extra body and crispness.

If uncertain of colorfastness, test on an inconspicuous area to prevent discoloration and dye bleed.

How To Order Finishing Touch Professional Aerosol Sizing
