

# StreeTAN<sup>®</sup>

**Safest for Tannin Stains™**

Choose StreeTAN  
for safe, fast &  
effective removal of  
tannin stains.

## Tannin Spotter

StreeTAN's<sup>®</sup> acidified formula safely and efficiently removes beverage and tannin stains. Stains in this group seldom respond to a neutral spotter and often require acidic action for complete removal. However, certain sensitive dyes may be damaged by products with unknown acidity. When using StreeTAN, you can be assured of safe removal of tannin stains.

StreeTAN is safest for coffee, beer, grass, liquor, mustard, soft drinks, tea, wine and other tannin stains. Choose StreeTAN for safe, fast and effective removal of tannin stains.

- **Outstanding Safety**

Beverage and tannin stains respond to acidic action, but certain dyes and fabrics are sensitive to products with unknown acidity. StreeTAN's controlled pH level is safe for most colors and fabrics, while effective on stains.

- **Remains Safe Even When Applying Steam**

Heat facilitates stain removal but can increase the possibility of color damage. With StreeTAN, you can take advantage of the convenience of the steam gun without fear of over-activity. Unlike some tannin spotters, StreeTAN's activity does not increase to damaging levels with heat. This simplifies your spotting routine by eliminating the need to rinse the stained area with cold water before flushing with steam. Plus, StreeTAN is completely water soluble, so it flushes easily and completely.

- **Loosens Stains**

StreeTAN's outstanding lubrication properties loosen stains. This results in better stain removal and increases your efficiency at the spotting board.

- **Quick and Easy Stain Removal**

StreeTAN suspends loosened soils to prevent redeposition so you spend less time at the spotting board. Plus StreeTAN has exceptional detergent qualities so you can return more stain-free garments to your customers.

- **Effectively Removes Last Traces of Ink Stains**

Sometimes those last traces of ink stains require extra attention for complete removal. StreeTAN, used alternately with StreePRO<sup>®</sup> protein spotter, can often eliminate ball point, indelible ink, and marking pen stains. This extra effort to completely eliminate any evidence of stains will keep your customers coming back.

All ingredients are biodegradable. Contains no Proposition 65 listed ingredients or halogenated compounds. Designed to comply with California 2013 VOC regulations.

## Instructions for Using StreeTAN®

Use StreeTAN at the spotting board to remove these and other tannin stains:

**Beer**  
**Soft Drinks**  
**Coffee**  
**Juice**  
**Grass**  
**Tea**  
**Liquor**  
**Wine**  
**Mustard**

StreeTAN is safe to most fabrics and colors. If colorfastness is questionable, test garment in a hidden area.

### **For Use at the Spotting Board**

1. Apply StreeTAN directly to stained area of dry fabric.
2. Tamp with spotting brush or work gently into stain with spatula.
3. Flush with water or steam gun, dry and level as needed, then dryclean as normal.
4. If scant traces of the stain remain, it may be necessary to repeat the procedure. If the stain is particularly tenacious and does not seem to respond, use GENERAL FORMULA NO. 209® where more aggressive action is needed to remove tannin stains.

Sometimes tannin stains require digestive action for complete removal. Stubborn stains and heat-set, exceptionally heavy, very large or unpleasant tannin stains can all be removed through the use of Devour® liquid digester.

Devour is extremely effective, but functions differently than other spotting chemicals. It is important to follow the special procedures and allow extra time for complete digestive action. See the Devour catalog page or [www.4streets.com](http://www.4streets.com) for complete details.

*Note: StreeTAN, with controlled acidic pH, is safe to most fabrics and colors not affected by water or steam.*

*In the unlikely event of a color change on fabrics when using StreeTAN, the immediate application of StreePRO® will often return the dye to its original color.*

### **How to Order StreeTAN**

StreeTAN is sold by authorized Street's distributors everywhere. Order StreeTAN from your local distributor in single 12 oz. applicator bottles, available in cases of 24, and single one-gallon containers, available in cases of four.

*Before using any chemical product, review the Material Safety Data Sheet (MSDS) for safe handling and proper disposal.*

*For professional drycleaning, wetcleaning and laundry use only.*
