

# 2-1 FORMULA®

The Versatile Combination™

Combining the features of PICRIN & STREETEX, 2-1 FORMULA offers the versatility to solve a wide variety of spotting problems.

## Combination Wet/Dry Spotter

Stains can be water-soluble, solvent-soluble, or both, but the nature of a stain is not always easy to determine, making it difficult to decide which spotter to use.

When you don't know what caused a stain, don't waste time with trial and error spotting. Reach for 2-1 FORMULA. It's the versatile solution for a wide variety of stains. That's because 2-1 FORMULA is a combination of two parts STREETEX® pre-spotter and one part PICRIN® volatile dry spotter. If the stain contains oil or grease, PICRIN will tackle it; if it contains water-soluble soil, the STREETEX goes to work.

- **Versatile**

Because of its ability to attack both water-soluble and solvent-soluble stains, 2-1 FORMULA is especially useful for removing many stains containing both water-soluble and solvent-soluble components like food and perspiration. 2-1 FORMULA will do the job that would otherwise require two or more stain removal products.

- **Effective on Embedded Soil**

No ready-made spotter is as effective as 2-1 FORMULA for brushing out embedded soil. With the application of 2-1 FORMULA on collars, cuffs, hemlines, and drape linings, recleaning can often be eliminated.

- **Effective on Latex Paint**

Conventional oily-type paint removers, while effective on oil-based paints, do not have the same ability to remove latex paint. With 2-1 FORMULA, latex paint stains can be removed faster and more effectively than with any ready-made spotter.

- **Removes Light Paint, Oil & Grease Stains**

2-1 FORMULA is effective on light oil and grease stains. When working with paint stains, it can be difficult to distinguish between latex and other types of paint. Because 2-1 FORMULA is effective on some oil-based paints, the formula has gained popularity as a general paint-oil-grease remover.

- **Soluble in Water & Solvent**

Because of its dual solubility, 2-1 FORMULA can be feathered with water and steam after spotting small, isolated stains. It can also be used as a reclean formula in perc when spotting larger or wide-spread stains.

- **Specially Marked Spotting Bottle Available Free of Charge**

Enables you to mix 2-1 FORMULA directly in the dispensing bottle without the need for other measuring aids.

## Instructions for Preparing and Using 2-1 FORMULA®

Use 2-1 FORMULA to remove these and other “mystery” stains:

Latex & Unknown  
Paint Stains  
Foods  
Gravy  
Sauces & Soups  
Light Oils  
Light Greases  
Cosmetics  
Inks  
Oil-Based Paints  
Embedded Soils On  
Collars, Cuffs,  
Hemlines & Drape  
Linings  
Unknown Stains

2-1 FORMULA is safe to most fabrics and colors. If colorfastness is questionable, test garment in a hidden area.

### How to Mix 2-1 FORMULA

Prepare 2-1 FORMULA by mixing two parts STREETEX® and one part PICRIN® in the specially marked spotting bottle.

1. Add STREETEX up to the level indicated on the spotting bottle.
2. Add PICRIN up to the second line.
3. Mix by covering the spout and inverting the bottle several times until a clear solution forms.

### Pre-Spotting

1. Apply 2-1 FORMULA directly to the stain.
2. Work gently with spatula or tamp with spotting brush until stain is completely loosened or removed.
3. Flush with water or steam, utilizing vacuum from spotting board.
4. Remove excess moisture with air gun.
5. Apply leveling agent to control moisture:

**MultiSPOT®** for perc systems

**SPOTLess hc®** for hydrocarbon (HFHC) systems

**GreenSPOT™** for GreenEarth® (D5) systems

6. Dryclean as normal.

### Post-Spotting

1. Apply 2-1 FORMULA directly to the stain.
2. Work gently with spatula or tamp with spotting brush until stain is completely loosened or removed.
3. Flush with water or steam, utilizing vacuum from spotting board.
4. Dry using air from spotting gun.

*Note: For moisture-sensitive applications, 2-1 FORMULA can be flushed with PICRIN and then dried.*

### How to Order STREETEX & PICRIN

STREETEX and PICRIN are sold by authorized Street's distributors everywhere. Order STREETEX from your local distributor in single one gallon containers, cases of four, or 15 gallon drums. Order PICRIN from your local distributor in single one gallon containers or cases of four.

Specially labeled spotting bottles are available from your distributor.

*Before using any chemical product, review the Material Safety Data Sheet (MSDS) for safe handling and proper disposal.*

*For professional drycleaning use only.*
