

Adco®

Laidlaw™

Adco Professional Products, LLC

QUALITY • INTEGRITY • DEPENDABILITY

Welcome to Adco Professional Products

Since 1908, Adco has been a leading manufacturer of a comprehensive line of specialty cleaning chemicals and detergents used in drycleaning, commercial laundry and janitorial and institutional cleaning applications. Our product categories include drycleaning, wetcleaning, laundry, spotting agents, cartridge filtration, boiler treatments, solvents and the Laidlaw line of products.

Adco has established products that you can rely on, year in and year out. We are proud of our history and look forward to sharing our future with you, a satisfied Adco and Laidlaw customer.

Inspiration and Innovation

A superior system means a superior outcome.

With Adco's advanced system, you have the ability to clean garments and return them to your customer in the same condition as the day that they first purchased them. We've made it easy with solutions that, when used consistently and in the right dosages, yield superior results, time after time.

See how Adco can help you meet your cleaning requirements and exceed your customers' expectations. Call our toll-free hot-line at 800-821-7556 or visit www.adco-inc.com to learn more about our products and processes.

HYDROCARBON SOLVENT SYSTEMS

C-300 – Combination Injection Detergent

Used in a one-bath or two-bath cleaning process, C-300 delivers optimum cleaning performance. Formulated with optical brighteners, softeners and conditioners that remain with the garment.

Optimum cleaning performance • Contains optical brighteners • Conditions and softens garments

Dyanite Xtra – Anionic Charge or Injection Detergent

Use Dyanite Xtra a one-bath or two-bath cleaning process, as either a charge or injection detergent. Preferred in cleaning heavily soiled articles to prevent soil transfer to other garments.

Excellent soil removal properties • Prevents redeposition

Fusion – Injection Detergent For Systems Using Powdered Clay Filtration

Fusion is a combination injection detergent designed for systems using powdered clay.

For powdered clay filtration systems • Prevents redeposition

Grand – Injection Detergent

Grand is an injection detergent with excellent soil removal properties. Controlled moisture helps remove water-soluble soils while preventing redeposition for good quality cleaning.

Excellent soil removal properties • Prevents redeposition • Controls moisture

Medallion – Combination Cationic Injection Detergent with Sizing

Medallion is a cationic detergent combined with a resin-based sizing to provide quality cleaning and easy finishing in one product.

Combination product • Easy to use • Provides quality cleaning • Easy finishing

DRYCLEANING DETERGENTS

Triple Play 2000 – Combination Charge or Injection Detergent, With Sizing and Brightener

Triple Play 2000 combines detergent, sizing and optical brightener in one convenient product. Use in a one- or two-bath cleaning process, as either a charge or injection product that affords ease of operation.

Combination product • Easy to use • Provides quality cleaning • Contains optical brighteners • Easy finishing

XXX Dri-Sheen Double – Charge Detergent For Use In Stoddard Solvents

Dri-Sheen Double Strength is a charge detergent designed for petroleum systems. Advanced formulation provides effective water-soluble soil removal.

Excellent soil removal properties • Prevents redeposition • Excellent moisture control

PERCHLOROETHYLENE SOLVENT SYSTEMS

Clorosheen – Charge or Injection Detergent

Heavy-duty drycleaning detergent with powerful brighteners. Controls moisture for maximum soil removal without water additions. Added fabric conditioners for extra full, yet soft hand.

Excellent soil removal properties • Prevents redeposition • Powerful brighteners

Crystal Soltex – Combination Anionic Detergent with Sizing and Brighteners

Crystal Soltex is a charge or injection combination detergent with sizing and brightener, for perchloroethylene or hydrocarbon systems. Contains optical brighteners to maintain bright colors and whites and agents to prevent odors.

Combination product • Easy to use • Provides quality cleaning • Contains optical brighteners

DFB Xtra – Combination Charge or Injection Detergent with Sizing and Brighteners

DFB Xtra is a combination detergent that is formulated to both clean and add just the touch of body needed to finish easily and hold press. Use in a one- or two-bath cleaning process.

Combination product • Easy to use • Provides quality cleaning • Contains optical brighteners • Easy finishing

Economy Line – Charge or Injection Detergent

Economy Line is a heavy-duty detergent with added brighteners for brighter colors and whiter whites. For use in perchloroethylene or hydrocarbon systems.

Easy to use • Contains optical brighteners

Normandy (Laidlaw) – Injection Detergent

Injection detergent formulated for today's quality drycleaners who are constantly distilling or cooking down solvent at the proper rate. Normandy attacks soil, offers superior stain removal, and helps control lint and static.

Superior stain removal • Provides quality cleaning • Prevents static and linting

Perk Sheen 324 – Charge Detergent

Perk Sheen 324 detergent is a premium charge detergent that provides superior cleaning by controlling moisture to prevent redeposition of soil. Leaves garments with a soft finish and like-new appearance.

Controls Moisture • Provides quality cleaning • Contains optical brighteners

Soft Kleen Xtra – Charge or Injection Anionic Detergent

Soft Kleen Xtra's unique formulation neutralizes electrical charges to control static. Use in a one- or two-bath cleaning process, as either a charge or injection detergent. Great for cleaning heavily soiled loads. Leaves garments feeling soft while eliminating static and linting.

Premium detergency • High water-soluble soil removal • Eliminates static • Prevents redeposition

Tiger – Combination Injection Detergent with Sizing and Brighteners

Tiger is a combination drycleaning detergent that provides for excellent cleaning, finishing and brightening of garments. Use in a one-bath or two-bath cleaning process, as an injection detergent.

Combination product • Easy to use • Provides quality cleaning • Easy finishing

Top Cat – Cationic Injection Detergent

Top Cat provides optimum cleaning performance with a cationic preference, wherein the softeners and conditioners remain with the garment. Formulated for added whitening and anti-static properties.

Optimum cleaning performance • Added whitening • Anti-static properties.

DRYCLEANING DETERGENTS & FINISHING

Vari-Clean (Laidlaw) – Combination Injection Detergent with Brightener

State-of-the-art injection detergent formulated to produce superior cleaning results, while reducing labor, by removing the water-soluble soil in the machine to decrease reruns. Powerful anti-static formula prevents static and lint.

Combination product • Easy to use • Provides quality cleaning • Contains optical brighteners

GREENEARTH® SOLVENT SYSTEMS

Advance Kleen – Charge or Injection Detergent and Conditioner

Advance Kleen enhances cleaning performance in Green Earth cleaning systems. Advance Kleen controls moisture, boosts soil removal and reduces redeposition, while the conditioners help with finishing.

Controls moisture • Boosts soil removal • Reduces redeposition • Eliminates static cling

Merit – Combination Injection Detergent with Sizing

Merit combines detergent and sizing for use in Green Earth systems. Use in a one- or two-bath cleaning process, as an injection detergent. Merit provides quality cleaning results, imparts body to the garments and improves finishing.

Combination product • Easy to use • Provides quality cleaning • Easy finishing

IPURA® SYSTEMS

PURAclean– “The IPURA Essential” Cleaning Additive

PURAclean™ provides the optimal way to clean with your IPURA system. PURAclean combines cleaning power, stain removal, moisture control and odor treatment all in one product. Custom designed for the IPURA system, PURAclean works differently than other additives by being sprayed onto the load in your IPURA machine through the use of a spray tank connected to the system. By introducing PURAclean directly into the machine, you will experience a more uniform, predictable result.

Increases cleaning performance & consistency • Reduces recleans and prespotting • Removes odors

FINISHING

Aerosol Spray Sizing

Aerosol sizing adds body without adding stiffness. Developed to enhance the finishing of garments by offering the ability to add sizing after cleaning.

Fashion Flakes

Completely soluble, dry flake sizing. Fast dissolving. Adds body and hand, not stiffness. Will not clog filters.

Fashion Finish – Synthetic

Injectable liquid sizing that adds texture, body and hand in garments. Designed to consistently surpass the original look and feel of the garment. Imparts new life to limp garments, vastly improving their appearance.

Injectable Sizing

Liquid sizing for use in hydrocarbon or perchloroethylene cleaning systems. Developed to impart texture, body and hand to garments by using a superior formulation, designed to consistently restore the original look and feel of the garment.

Renew

Economical, quality sizing product that helps restore the original look and feel while resulting in a professional finish.

Texture Life

Economical, quality sizing product that helps restore the original look and feel while resulting in a professional finish.

WET-SIDE SPOTTERS

BPR – Wet-side Protein Stain Remover

Use BPR to remove blood, milk, eggs, mud, perspiration and body discharge. BPR can be safely used on silks and wools without causing fiber damage. When used after applying Neutra, it will help speed up the process of stain removal.

Neutra – Wet-side Neutral Lubricant

Neutra is a wet-side spotting agent and neutral synthetic detergent that removes water-soluble stains. It is stable to acid or alkali, increasing the effectiveness of specialized wet-side spotters like BPR or Super Tan+. Used to remove soil, albumin, blood, certain inks, lipstick, beverage, fruit stains, perspiration, and salad oils. Also works as a lubricant to prevent pilling.

RSR Digester – Wet-side Protein Stain Remover

RSR is a powdered digester that contains enzymes to remove stubborn protein stains. RSR can be mixed for the spotting board or used in a bath solution. RSR gobbles up protein stains embedded in garment fibers.

Super Tan + – Wet-side Tannin Stain Remover

Slightly acidic, Super Tan + is useful on many food- and plant-based stains like coffee, sugar, fruit juices and soft drinks. When used with Neutra or Tergit, it helps speed up stain removal by breaking down the surface tension on the fibers. Level with Easy Out to prevent circles and rings when drycleaning.

Wetspot – Wet-side Protein Remover

Efficiently and economically removes ground-in soil, dry inks, perspiration, dried blood, discharge, animal fat, red dyes, medicines, food, and other water-soluble stains. Can be used to safely remove soft drink and red wine stains. Wetspot is an ammoniated protein spotter not to be used on silks or wools.

DRY-SIDE SPOTTERS

APOG (American POG) – Dry-side Oily Type Stain Remover

All-purpose paint, oil and grease remover. Efficiently and economically removes paint, varnish, grease, shoe polish, tar, salad oils, cosmetics, ink and many other hard-to-remove stains. Penetrates and lubricates to soften hardened stains for easy removal.

H/C Wetspo (Laidlaw) – Dry-side POG for use in Hydrocarbon Systems

Advanced formula spotter with concentrated penetrating power to remove such stains as oil, paint, machine and motor oil, salad and cooking oil, wax, cosmetics and inks. Can be applied by spotting bottle, spray or brush.

Laundry Wetspo (Laidlaw) – Wet-side Biodegradable POG

An advanced water-based paint, oil, grease, lipstick, shoe polish, ink and wax remover that can be placed into the wash wheel after spotting. Laundry Wetspo is biodegradable.

Pull Out – Post-spotting POG

Removes grease, soil and oily-based stains. Designed for use after drycleaning.

Puro – Dry-side VDS

Volatile dry solvent used for stains like cosmetics, tar, ink, grease and paint. A quick-penetrating, quick-evaporating solvent, excellent for touch-ups and removing greasy, oily soil. Safe for all fabrics. May be used with all solvents.

SB POG – Dry-side POG for use in GreenEarth® Systems

Paint, oil, and grease remover for use with GreenEarth solvent. Also removes lipstick and makeup stains.

Wetspo (Laidlaw) – Dry-side POG

Advanced formula spotter with concentrated penetrating power to remove such stains such as oil, paint, machine and motor oil, salad and cooking oil, wax, cosmetics and inks. Can be applied by spotting bottle, spray or brush.

COMBINATION SPOTTERS

Blue Flash – Spotter for Combination Stains

Use Blue Flash for the removal of stubborn combination stains like makeup, most inks, heavy greases, salad dressings, condiments and sauces. Specially formulated to remove stains that normally require multiple spotters. Particularly effective for unknown stains. Use in all drycleaning, wetcleaning and laundry systems.

H/C TOO – Combination Spotter for Hydrocarbon Systems

Hydrocarbon-based semi-wet spotter used to remove combination stains like gravy, ice cream, latex paint and salad dressing. For use in all petroleum and hydrocarbon systems. Use on the spotting board or as a no-rinse pretreatment. Contains no chlorinated solvents.

Hydro Spot – Combination POG

Combination wet/dry oily-type stain treatment used in the removal of paint, grease, salad oils, cosmetics, adhesives, inks and other tough stains. For use in drycleaning, wetcleaning or laundry.

Release – Wet-side Grease and Ink Spotter

Wet-dry spotter for treatment of grease and oil stains. It works well with other water-based spotters such as BPR and Super Tan +.

Semi-Wet – Wet-side Combination Spotter

Ready-to-use wet-dry spotter for treatment of stains such as gravy, meat juices, food, ice cream, latex paint, salad dressings and unknown stains. Contains neutral lubricant to prevent pilling.

PRE-TREATMENTS, SPRAY SPOTTERS, LUBRICANTS AND LEVELING AGENTS

Boot (Laidlaw) – Pre-spotter for Drycleaning Systems

Boot is a crystal clear, non-fatty acid, spot, soil and stain spray spotter and a drycleaning detergent booster. Safe on all fabrics not affected by water or solvent. No brushing, rubbing, or tamping is necessary.

Collar Solution – Collar and Cuff Scrub

Water-based formula developed to remove grease and oil stains. Safe on all fabrics and colors that are washable.

CNC – Laundry Collar and Cuff Pre-spotter

Remarkably effective collar and cuff pre-spotter. Combines both dry-side and wet-side spotting agents that penetrate and break up greasy, ground-in soils and hard-to-remove fatty acids. Rinses in cold or hot water. Contains no chlorinated

solvents, harsh alkalis or bleach.

Easy Out – Wet-side Spotter and Leveling Agent

Easy Out penetrates stains and absorbs any left over moisture after spotting to prevent redeposition and rings. Specially designed for water-sensitive fabrics like silk, rayon and acetates.

Neutra – Wet-side Neutral Lubricant

Neutral wet-side spotting agent and neutral detergent that removes water-soluble stains. It is stable to acid or alkali, increasing the effectiveness of specialized wet-side spotters like BPR or Super Tan+. Used to remove soil, albumin, blood, certain inks, lipstick, beverage, fruit stains, perspiration, and salad oils. Also works as a lubricant to prevent pilling.

Nox-Spots – Wet-Side Concentrated Collar and Cuff Pre-spotter

Concentrated wet-side spotter that is mixed with water for spray application. Contains a degreasing agent formulated for very effective use in laundry and drycleaning where moisture and a degreasing effect is required. Especially effective in areas with high percentages of fatty acids such as collars and cuffs.

SB Lev – Dry-side Spotter and Leveling Agent for Water-Sensitive Fabrics in GreenEarth® Systems

When used as a spotting agent, SB Lev softens and penetrates heavy soils and also acts as a leveling agent. Safe on brightly colored silks, rayons, acetates and other sensitive fabrics.

Silk Pre-spotter (Laidlaw) – Pre-spotter for Water-Sensitive Fabrics

Formulated for pre-spotting water sensitive fabrics such as silk, cotton, wool, linen, ramie, rayon, satin and cashmere. Also works on polyesters and blends. Safest alternative to wet-side spotting; saves time, labor, guesswork and mistakes.

Tergit (Laidlaw) – Wet-side Neutral Lubricant

Neutral wet-side spotting agent that can be used with protein and tannin spotters to help break down the surface tension of the fibers. Can also be used to remove redeposition on garments. Level with Easy Out to prevent circles and rings when drycleaning.

Water White – Wet-side Spray Spotter Concentrate

Pre-spotter that helps to break down water-soluble soils and adds beneficial moisture to the wheel, which helps remove water-soluble soils on the entire load.

SPECIALTY SPOTTERS

Acetic Acid – Tannin Stain Remover

Stain removal agent for use where additional acidity is required and for neutralizing alkaline spotting agents. Useful for removing the last traces of a stubborn tannin stains. Applied in conjunction with tannin removal agents, without flushing, to boost the chemical action.

Amyl Acetate – Ink, Heavy Grease and Grass Stain Remover

Dissolves and aids in the removal of lacquers, nail polish, shellac, adhesives, varnish, grass stains, plastic cements, gum, ink, melted buttons, cosmetics and other dry-side stains. Safe to use on most fabrics.

Glue-Away – Super Solvent for Removal of Plastic Glues

Excellent on nail polish and especially tough stains, such as lipstick, paints, tar, pitch, chewing gum, shoe polish, etc.

SPECIALTY SPOTTERS & ODOR TREATMENTS

Specialty Spotters	Perc	Petroleum / Hydrocarbon	Green Earth	Wetcleaning	Laundry
Acetic Acid					X
Amyl Acetate					
Glue-Away					
Knock Out					
Rust and Stain Remover					

Knock Out – Ink Remover

Ink remover that efficiently removes ink, lacquer, nail polish and some glues.

Rust and Stain Remover – Rust Remover

Dry-side spotter similar in action to acetone. Dissolves and aids in the removal of lacquers, nail polish, shellac, adhesives, varnish, grass stains, plastic cements, gum, ink, melted buttons, cosmetics and other dry-side stains. Safe on most fabrics.

ODOR TREATMENTS

All Star– Cleaning Booster, Odor Treatment & Fresh Clean Scent.

Provides a cleaning boost for heavily soiled loads while neutralizing odors during the dry cleaning, wet cleaning, or laundry process.

Aqua Sunshine Fresh – Scented Odor Treatment

Fresh citrus smelling odor treatment.

WETCLEANING

Wetcleaning has played and continues to play an important role in the full-service professional fabricare plant. Some garments cannot be drycleaned or best results can be achieved by using the wetcleaning process. The drycleaning process is often the best choice for restoring soiled garments to like-new condition because of the inherently safe and effective processing environment. However, there are occasions when professional wetcleaning is either demanded or more desirable because of care labeling, garment fiber content or construction, dye fastness, or type or extent of soiling.

Wetcleaning process techniques may be as simple as immersion by hand in a tub or pail, use of a home-style top-loading washer or front-loading high-efficiency machine, or as precise as using purposely designed wetcleaning machines that incorporate automatic process controls. The particular process technique chosen depends on the type and/or volume of garments requiring wetcleaning.

DETERGENTS

Fine Clean – Wetcleaning Detergent

A powerful yet gentle wetcleaning detergent. Part of the Fine Clean product line for professional wetcleaning. Excellent for delicates and “hand wash” type items. Provides exceptional water-soluble stain removal.

Fine Plus – Wetcleaning Combination Detergent

Combination wetcleaning “one-shot” detergent with sizing, conditioner and brightener. Part of the Fine Clean product line for professional wetcleaning.

Khaki Klean – Wetcleaning Combination Detergent

Wetcleaning combination detergent with softener for casual wear. Formulated to powerfully remove stains, yet leave clothes with a nice soft feel. Ideal for top or front loaders. Effective on key marks, coin, and carbon stains commonly found in khakis, polos and business-casual wear.

Power Brite – Wetcleaning Detergent

Highly versatile wetcleaning detergent that is gentle enough for silks yet powerful enough to remove the toughest of soils on khakis. pH adjusted to help prevent color loss in garments. For best results, use with Soften All Fabric Softener or AquaSize.

Soft N Brite – Gentle Liquid Laundry and Wetcleaning Detergent

Gentle liquid laundry and wetcleaning detergent for whiter whites and vibrant colors. Phosphate-free formula with a near neutral pH, to provide a gentle but effective, cleaning product for casual wear garments and delicate fabrics.

FINISHES, SOFTENERS, CONDITIONERS AND RETEXTURIZERS

AquaSize (Laidlaw) – Sizing for Laundry and Wetcleaning

Sizing product designed to reduce finishing time on laundered garments. Restores the original feel and crispness to fabrics, providing a firmer finish to wetcleaned items. Safe for all fabrics that can be wetcleaned or laundered. Ideal for tuxedo shirts.

Fine Replenish – Wetcleaning Finish, Conditioner, and Color Guard

Unique, water-based restorer for adding luster, deepening color, and minimizing the chalky appearance of black items and some fabrics. Part of the Fine Clean product line for professional wetcleaning.

Fine Texture – Combination Wetcleaning Sizing and Conditioner

Combination sizing and conditioner. Designed for use in wetcleaning wools, silks, rayons and other fine fabrics. Helps to prevent felting and shrinkage during drying. Gives body and increased dimensional stability to fabric for a soft, full hand. Speeds finishing and prevents static cling. Part of the Fine Clean product line for professional wetcleaning.

STAIN REMOVAL

Acetic Acid

Stain removal agent for laundry where additional acidity is required and for neutralizing alkaline spotting agents. Useful for removing the last traces of a stubborn tannin stains. Applied in conjunction with tannin removal agents, without flushing, to boost the chemical action.

CNC – Laundry Collar and Cuff Pre-spotter

Remarkable and effective collar and cuff pre-spotter. Specially formulated for shirt laundries. Combines both dry-side and wet-side spotting agents that penetrate and break up greasy, ground-in soils and hard-to-remove fatty acids. Rinses in cold or hot water. Contains no chlorinated solvents, harsh alkalies or bleach. Will not damage fabrics or finishes.

Collar Solution – Collar and Cuff Scrub

Water-based formula developed for wetcleaning and laundry to remove grease and oil stains. Safe on all fabrics and colors that are washable.

Laundry Wetspo (Laidlaw) – Wet-side Biodegradable POG

An advanced water-based paint, oil, grease, lipstick, shoe polish, ink and wax remover that can be placed into the wash wheel after spotting. Laundry Wetspo is biodegradable.

Nox-Spots – Wet-Side Concentrated Collar and Cuff Pre-spotter

Concentrated wet-side spotter that is mixed with water for spray application. Contains a degreasing agent formulated to make it more effective in laundry and drycleaning where moisture and a degreasing effect is required. Especially effective in areas with high percentages of fatty acids such as collars and cuffs. For use in drycleaning and laundry.

DEGREASERS, BOOSTERS, STIMULANTS AND TREATMENTS FOR RETAIL LAUNDRIES AND WETCLEANING

Aqua Sunshine Fresh – Liquid Laundry Odor Treatment

Fresh citrus smelling odor treatment and deodorant.

Concentrated Laundry Degreaser (CLD – Laidlaw) – Liquid Laundry Degreaser

Biodegradable mixture of citrus extract oil, non-ionic surfactants and sequestrants, with tough degreasing properties and a pleasant citrus aroma. Effective laundry degreaser for lower temperatures (90-140° F). Can be used in both wetcleaning and laundry. Recommended for heavier classifications like table linens, party rentals and chef outfits.

Degreaser – Liquid Laundry Degreaser

Effective laundry degreaser for higher temperatures (120-150° F). Recommended for degreasing rags, table linens, and other commercial applications.

Formula Z – Liquid Laundry Booster

A special formula for shirt laundering and wetcleaning that softens water, brightens colors, keeps whites their whitest and removes tough stains. Use in the washer as a booster, as a pre-spotter in wetcleaning. Formula Z is effective on blood, grease, oil, grass, fruit, makeup, wine, baby formula, food stains, perspiration, shoe polish, crayon, ink and other tough stains. Perfect for uniforms, sport and school applications.

Stinger – Liquid Laundry Degreaser, Booster and POG

Booster, degreaser and POG (paint, oil and grease) remover for lower temperature laundry. Particularly recommended for heavy, greasy soils and particulate soils found in industrial applications and mechanics' uniforms.

Swan Cote – Aerosol Laundry Stain Repellent

Stain repellent with Fabriguard UV protection. Effective for restoration, drapery cleaning and similar items.

LAUNDRY – COMMERCIAL

Commercial laundry facilities process large quantities of garments for institutional, hospitality, healthcare and other industries. Getting these garments clean requires the proper process decision, water quality, mechanical action, heat and chemicals. These factors work together to get clothes clean. Trust Adco's detergents, stain removal agents, and additives for the successful operation of commercial laundries.

5-PART LAUNDRY SYSTEM FOR COMMERCIAL LAUNDRIES

Designed for operations using multiple professional washers in larger commercial laundry operations, and for larger OPLs (On Premises Laundries).

1. Flex – Liquid Laundry Detergent

Flex detergent is formulated to provide the main cleaning and grease removal capabilities for the 5-Part Laundry System.

2. ALK 20 – Alkaline Booster

An alkaline booster that provides added stain removal capability for the 5-Part Laundry System.

3. Liquid Sour – pH Restorer

The Liquid Sour formula is designed to reduce pH to an acceptable level in the final rinse in the 5-Part Laundry System.

4. Soften All – Fabric Softener

Liquid softener and conditioner. Eliminates static and excessive linting. Used in the 5-Part Laundry system and in other professional laundry and wetcleaning applications.

5. Bleach – Use as an integral step in the 5-Part Laundry System:

Chlorine Bleach - Chlorine Bleach provides whitening and brightening of garments.

Oxygen Bleach - A hydrogen peroxide solution that provides whitening and brightening of garments.

3-PART LAUNDRY SYSTEM FOR COMMERCIAL LAUNDRIES

Offers flexibility to customize solutions for any size business. Ideal for hotels, nursing homes, shirt laundries, schools, and other OPLs (On Premises Laundries) with limited space. Also recommended for drycleaners with moderate to large shirt laundry operations.

1. Flex Plus – Liquid Laundry Detergent

Flex Plus combines the cleaning and grease removal capabilities of Flex Detergent with the alkalinity boost from ALK 20.

2. Soft Sour – Combination Liquid Sour and Fabric Softener

Soft Sour combines the neutralizing capabilities of Liquid Sour with softeners and conditioners. Eliminates static and excessive linting.

3. Bleach – Use as an integral step in the 3-Part Laundry System

Chlorine Bleach - Chlorine Bleach provides whitening and brightening of garments.

Oxygen Bleach - A hydrogen peroxide solution that provides whitening and brightening of garments.

DEGREASERS, BOOSTERS, STIMULANTS AND TREATMENTS FOR COMMERCIAL LAUNDRIES

Concentrated Laundry Degreaser (CLD – Laidlaw) – Liquid Laundry Degreaser

Biodegradable mixture of citrus extract oil, non-ionic surfactants and sequestrants, with tough degreasing properties and a pleasant citrus aroma. Effective laundry degreaser for lower temperatures (90-140° F). Can be used in both wetcleaning and laundry. Recommended for heavier classifications like table linens, party rentals and chef outfits.

Degreaser – Liquid Laundry Degreaser

Effective laundry degreaser for higher temperatures (120-150° F). Recommended for degreasing rags, table linens, and other commercial applications.

Stinger – Liquid Laundry Degreaser, Booster and POG

Booster, degreaser and paint, oil and grease remover for lower temperature laundry. Particularly recommended for heavy greasy soils and particulate soils found in industrial uniforms, mechanics' uniforms and shops.

The retail laundry line of products is designed for professional dry cleaners who are laundering shirts, table linens, casual wear, household and other items using either professional or consumer washing machines.

POWDERED DETERGENTS FOR RETAIL LAUNDRIES

Adco 1340 – Built Powdered Laundry Detergent

Built laundry detergent for superior cleaning performance on greasy soils. Formulated for industrial cleaning jobs encountered in retail operations from shirts to table linens. Safe on all washable, colorfast fabrics including Dacron and polyester blends. Do not use on natural silk or wool. Can be used with liquids in hybrid system.

Eagle – One-shot Powdered Laundry Detergent

Low-temperature formula, powdered one-shot laundry detergent with enzymes, oxygen bleach, degreasers, and dispersing agents. Usable with powder and liquid hybrid systems and consumer load washers. A sour in final rinse is advised. Effective for shirt laundry or hospitality use.

Ovation (Laidlaw) – One-shot Powdered Laundry Detergent

Powdered, low-temperature formula, one-shot laundry detergent with enzymes, oxygen bleach, degreasers, and dispersing agents. A sour in final rinse is advised. Effective for shirt laundry or hospitality use.

Premium Plus – One-shot, Triple-Enzyme Powdered Detergent

Deliver a premium shirt to your customers with Premium Plus, one-shot combination detergent with triple enzymes, oxygen bleach, degreasers and dispersal agents for the brightest shirts.

Target – Powdered Laundry Detergent

Economy powdered laundry detergent with fresheners, brighteners and lemon-fresh scent. Versatile and easy to use. Recommended for consumer-type machines, and professionally cleaned household laundry.

LIQUID DETERGENTS FOR RETAIL LAUNDRIES

Adco Liquid Laundry Detergent – Liquid Laundry Detergent

Commercial laundry detergent with brighteners for whiter whites. Highly concentrated and high sudsing. Recommended for consumer-type machines, and professionally-cleaned household laundry.

Discover – Liquid Laundry Detergent

Liquid laundry detergent for shirts and commercial type laundry applications. Has controlled pH and optical brighteners.

Soft N Brite – Gentle Liquid Laundry and Wetcleaning Detergent

Gentle liquid laundry and wetcleaning detergent for whiter whites and vibrant colors. Phosphate free and formulated with a near neutral pH, to provide a gentle yet effective cleaning product for casual wear garments and delicate fabrics.

BLEACHES FOR RETAIL LAUNDRIES

Chlorine Bleach – Liquid Chlorine Bleach

Liquid chlorine bleach provides whitening and brightening of garments.

Horizon – Powdered Oxygen Bleach

Color-safe powdered oxygen bleach that provides whitening and brightening of garments without affecting garment dyes.

Oxygen Bleach – Liquid Oxygen Bleach

A hydrogen peroxide solution that provides whitening and brightening of garments.

SOFTENERS, SIZINGS AND SOURS FOR RETAIL LAUNDRIES

Aqua Size (Laidlaw) – Sizing for Laundry and Wetcleaning

Sizing product designed to reduce finishing time on laundered and wetcleaned garments. Restores the original feel and crispness to fabrics. Safe for all fabrics that can be wetcleaned or laundered. Ideal for tuxedo shirts.

Liquid Rust Sour – Liquid Laundry Sour And Rust Inhibitor

Liquid sour and rust inhibitor. Designed to reduce the pH to an acceptable level. Used where rust and iron is an issue.

Nullify – Powdered Laundry Sour

Powdered sour designed to reduce pH to an acceptable level. Use with 1340 and other powdered laundry detergents.

Soften All – Liquid Laundry Fabric Softener

Fabric softener that conditions garments to add softness. Eliminates static and excessive linting. For use in all wetcleaning systems and washing machines.

RETAIL LAUNDRY & JAN-SAN

Soft Sour – Combination Liquid Sour and Fabric Softener

Soft Sour combines the neutralizing capabilities of Adco Liquid Sour with softeners and conditioners. Eliminates static and excessive linting.

STARCHES AND SIZINGS FOR RETAIL LAUNDRIES

AE-47– Liquid Starch Finishing Agent

Finishing agent containing natural and synthetic starch ensures a performance consistency across all fabric compositions. Designed to be compatible with injection systems, provides body and stiffness to all types of fabrics. Does not build up on fabric or presses when used as recommended.

Old Blue – Liquid Starch

Heavy duty liquid starch. Natural and synthetic blend that provides body and stiffness to all types of fabric. Allows fabric to remain pliable and wrinkle resistant.

Rigid – Instant Powder Starch

Instant powder starch formulated to give shirts and other laundered garments a crisp finish. This starch dissolves readily and disperses easily in warm water. Does not require the use of a starch cooker for the quality starch look.

JAN-SAN PRODUCTS FROM ADCO

The Adco line of cost-effective Jan-San products is designed for use by hotels and motels to keep their rooms clean, fresh and ready for new customers.

Disinfectant Concentrate

Kills viruses, bacteria and other organisms on hard, non-porous surfaces. Used to disinfect the surfaces that are found in common areas and in the room after a guest leaves.

Floor Cleaner Concentrate

A general purpose cleaner for floors that removes grease, grime and other dirt on floors in your facility.

Glass Cleaner Concentrate

A neutral cleaner that leaves glass and mirrors clean and free of streaks.

Odor Neutralizer Concentrate

Removes odors that can be found in rooms. Neutralizes the odor and leaves a clean, fresh fragrance.

Tub & Tile Concentrate

An acid-based cleaner useful for removing calcium, lime, rust and other deposits that can be found on various bathroom surfaces.

BOILER TREATMENT, FILTRATION & SOLVENTS

BOILER TREATMENT

Boiler Compound

Highly effective boiler water treatment that prevents the formation of scale, corrosion and oxygen pitting with regular use. Softens and removes old scale. Protects steam and condensate lines.

Boilsoft

For units that have water softer systems. Non-foaming boiler water treatment that prevents the formation of scale, corrosion and oxygen pitting with regular use. Softens and removes old scale. Protects steam and condensate lines.

Boiler Guard

Economical boiler water treatment that prevents the formation of scale, corrosion and oxygen pitting with regular use. Softens and removes old scale. Protects steam and condensate lines.

CARTRIDGE FILTRATION

Adco has a complete line of cartridge filters designed to remove contaminants in most types of drycleaning systems.

Twin 2AC – Large format, split, activated carbon cartridges

The Twin 2AC is a large format cartridges filled with only the best activated carbon granules for superior removal of dye and other color impurities. Around the activated carbon, the AC also provides up to one third more usable surface area than other brands with more premium filter paper and precise, deep pleating that holds more dirt and lasts longer. The Twin 2AC filters both solvent soluble contaminants, such as dyes, fatty acids and insoluble soils, such as lint, dirt, etc. from the solvent.

Quad 4 CC – Small format carbon core cartridges

The Quad 4CC, is a carbon core cartridge that filters both solvent soluble contaminants, such as dyes, fatty acids, etc., and insoluble materials, such as lint, dirt, etc., from the solvent.

Quad 4 AC – Small format all carbon cartridges

The Quad 4AC, as an all carbon cartridge, filters solvent soluble contaminants such as dyes, fatty acids, etc., from the dry cleaning solvent. Quad 4AC cartridges are typically placed after a spin disk filter in a drycleaning machine.

Twin 2A – Large format, split, adsorption cartridges

The Twin 2A, a carbon/clay mixed cartridge, filters both solvent soluble contaminants, such as dyes, fatty acids, etc., and insoluble soils such as, lint, dirt, etc., from the dry cleaning solvent.

iP-Care 2C – Large format, split, clay cartridges for iPura systems

iP-Care cartridges use only clay as the adsorbent in the core and filter paper on the exterior to remove contaminants through filtration.

SOLVENTS

Eco Solv – High Flash Hydrocarbon Solvent

EcoSolv is a 100% hi-purity, hydrocarbon-based, Class IIIA solvent with excellent cleaning properties. EcoSolv is compatible with all hydrocarbon detergents and spotters.

HC Boost – High Flash Solvent

HC Boost is a drop-in solvent for all modern Class III A hydrocarbon dry-to-dry machines. Used together with one of Adco or Laidlaw's multi-fabric detergents, HC boost provides a simple, dependable and economic solvent cleaning solution.

Ktex– High Flash Solvent

Ktex™ is a non-halogenated cleaning solvent developed by Bardahl and Finanziaria Macchine Bolognese SPA (FMB Group) exclusively for use in Firbimatic, Realstar and Union drycleaning machines. It is a drop in solvent for all these brands of modern Class IIIA drycleaning machines. Used together with one of Adco or Laidlaw's multi-fabric detergents, Ktex provides excellent cleaning performance and offers cleaners a system that is efficient, and costs less to use. Ktex cleaning solvent is available in the United States and Canada through the Industrial Division of the Street, Adco, Laidlaw Companies.
