

H2PRO™ Detergent is designed for everyday use to loosen & suspend soils so they can be rinsed away in the wetcleaning process.

Detergent for Wetcleaning

H2PRO® Detergent is a concentrated cleaning agent that is strong enough for everyday use, yet gentle enough for use with delicate items processed in water.

H2PRO Detergent contains a buffering system which helps stabilize fabrics by lowering the inter-fiber friction during the cleaning process, which reduces felting and shrinkage. This buffering system also aids in minimizing dye bleeding to help preserve colors and retain their intensity.

With highly active ingredients, **H2PRO Detergent** is extremely effective in loosening, surrounding and suspending soil until it can be rinsed away. This helps ensure that whites stay white and colors stay bright.

H2PRO Detergent can be used in multiple applications including hand washing, top-loading (home-style) machines, front-loading (high-efficiency) machines and professional laundry and wetcleaning machines.

H2PRO products are designed to work together for optimal cleaning and finishing results in water.

- **Concentrated Formula**

H2PRO Detergent is a concentrated professional formulation for use in hand washing, top-load and front-load washing machines, as well as professional wetcleaning systems.

- **Loosens & Suspends Soils**

Formulated for use in wetcleaning machines, top loading machines or for handwashing, **H2PRO Detergent** is designed to safely and effectively loosen and suspend soil for removal during the rinse cycle.

- **Performs Effectively at Low Temperatures**

Some detergents require higher temperatures to remove soil effectively. **H2PRO Detergent** is specially designed to produce great results even in cold water.

- **Keeps Whites White & Colors Bright**

H2PRO Detergent has excellent soil suspension properties to prevent redeposition. A special buffering system helps to protect colors from fading and optical brighteners to keep whites white and colors bright.

- **Reduces Felting & Shrinkage**

A specially-designed buffering system helps reduce felting and shrinkage to keep your clothes looking like new and protect against cleaning-related damage.

- **Gentle on Delicate Fabrics**

Delicate fabrics need special care. **H2PRO Detergent** offers the best possible care against fiber damage and shape loss.

Clean Smarter With Water™. Use H2PRO.

Instructions for Using H₂PRO® Detergent

Use H₂PRO Detergent on water-washable fabrics and hand washables.

Before cleaning garments, remove any solvent-soluble or hard-set stains using the appropriate Street's stain removers. Refer to care label for water temperature.

Hand Washing

1. Use a clean sink or plastic pail. Add **H₂PRO Detergent** at a rate of 1/4 oz. per 1-gallon (2 mL per 1L) of water
2. Soak lightly soiled fabrics for approximately 15 minutes, gently squeezing the wash water through the fabric periodically. Soak medium to heavily soiled fabrics approximately 30 minutes, squeezing gently periodically.
3. Carefully but thoroughly, squeeze wash water out of fabrics. DO NOT wring fabric.
4. Using another sink or plastic pail, rinse the fabrics with fresh water. Repeat until rinse water is clear.

Top-Loading (Home-Style) Washers

1. Before starting washer, add **H₂PRO Detergent** based on the appropriate water levels below:
 - For HIGH water level (full load) add 2 oz. to 4 oz (60 mL to 120 mL) based on the degree of soiling
 - For MEDIUM water level (medium load) add 1 oz to 3 oz. (30 mL to 90 mL) based on the degree of soiling
 - For LOW water level (small load) add 1/2 oz. to 2 oz (15 ml to 60 mL) based on the degree of soiling
2. Add soiled fabrics into the wash wheel and select appropriate setting based on care label, fiber content and construction.

Front-Loading (High-Efficiency) Washers

1. Add **H₂PRO Detergent** to the detergent dispenser based on the appropriate load levels below:
 - For FULL load add 1 oz. to 1-1/4 oz (30 mL to 37 mL) based on the degree of soiling
 - For MEDIUM load add 3/4 oz. to 1 oz (22 mL to 30 mL) based on the degree of soiling
 - For SMALL load add 1/2 oz. to 3/4 oz (15 mL to 22 mL) based on the degree of soiling
2. Add soiled fabrics into the wash wheel and select appropriate setting based on care label, fiber content and construction.

Professional Laundry or Wetcleaning Machine

1. Add soiled fabrics into the wash wheel and select appropriate setting based on care label, fiber content and construction.
2. Add **H₂PRO Detergent** at the rate of 1-1/4 oz to 1-1/2 oz per 10 gallons (10 to 12 mL per 10 L) of water (refer to machine manual for water equivalents). Alternatively, detergent can be added at a rate of 2-1/2 oz to 3 oz per 10 lbs. (160 to 200 mL per 10 kg) of garments.

Fabric Finish

For fabrics requiring a soft and supple hand such as cotton sweaters, blankets, golf shirts and woolens, add **H₂PRO Fabric Conditioner** to the final rinse cycle. For fabrics requiring a firm hand or fabrics which are difficult to press after processing in water such as rayon, linen and cotton, add **GELATONE® Fabric Finish** to the final rinse. Refer to the product packaging or sales sheet for specific use instructions.

How to Order H₂PRO Detergent

H₂PRO Detergent is sold by authorized Street's distributors. **H₂PRO Detergent** is available in single one-gallon (3.785 L) containers, cases of four, 5-gallon (18.93 L) pails or 15-gallon (56.78 L) drums.

Before using any chemical product, review the Safety Data Sheet (SDS) for safe handling and proper disposal.

For professional wetcleaning & laundry use only.
