BPR Use Instructions

For professional drycleaning, wetcleaning & laundry use only. Read Safety Data Sheet for further instructions, warnings, and first aid information before using this product. If colorfastness is questionable, test fabric in a hidden area.

Pre-Spotting for Wetcleaning or Laundry:

Apply and allow the product to penetrate the stain. Tamp or work the stain with a spatula. Flush with cool water or steam. Repeat if necessary. Procedure may be repeated on heavily stained areas. Wetclean or launder as normal.

Pre-Spotting for Drycleaning:

Apply and allow the product to penetrate the stain. Tamp or work the stain with a spatula. Flush with cool water or steam, utilizing the vacuum from spotting board. Use air gun to remove excess moisture. Apply a leveling agent, like **Easy-Out™**, before cleaning to control moisture, and prevent water rings. Dryclean promptly.

Stain Removal Tips:

- For removing deeper set stains, heating the treated area with steam gun increases the alkaline action of **BPR** to aid in protein stain removal.
- Apply a few drops of **NEUTRA™** or similar neutral lubricant before using **BPR** to help speed stain removal.
- For fabrics that are prone pilling, it is recommended to apply **NEUTRA** before working with spatula.
- Sometimes protein stains require digestive action for complete removal; stubborn stains and heat-set or very large tannin stains can be removed through the use of **Laidlaw RSR®** digester or Street's **Devour®** liquid digester.
- In the unlikely event of a color change on fabrics when using **BPR™**, the immediate application of **Super-Tan+™** or Street's **StreeTAN®** will often return the dye to its original color.

How to Order BPR

Order from your authorized Adco -Laidlaw local distributor in 1-gallon (3.78 L) containers, and boxes of four 1-gallon (3.78 L) containers.
