BLUE FLASH Use Instructions

For professional drycleaning use only. Read Safety Data Sheet for further instructions, warnings, and first aid information before using this product. If colorfastness is questionable, test fabric in a hidden area.

Pre-Spotting for Wetcleaning or Laundry:

- Apply and allow the product to penetrate the stain. (For ink, place a small piece of cloth underneath). As needed, blot out, re-apply, and allow to penetrate (for ink: replace cloth as needed). Tamp or work the stain with a spatula. Flush with water or steam. Wetclean or launder as normal.

Pre-Spotting for Drycleaning:

- Apply and allow the product to penetrate the stain. (For ink place a small piece of cloth underneath). Blot out, re-apply, and allow to penetrate as needed (for ink: replace cloth as needed). Tamp or work the stain with a spatula.
 - If flushing with water or steam: utilize the vacuum from spotting board. Use air gun to remove excess moisture. Apply a leveling agent, like Easy-Out™, before cleaning to control moisture, and prevent water rings. Note: for ink stains, avoid using steam or heat during flushing.
 - If flushing with a volatile dry-side spotter: dry thoroughly with the spotting gun and then machine clean promptly.

Post-Spotting:

- Apply and allow the product to penetrate the stain. Tamp or work the stain with a spatula. Flush with either water or steam and feather dry.

How to Order Blue Flash

Order from your authorized Adco -Laidlaw local distributor in 1-gallon containers, and boxes of four 1-gallon containers.
